

DX2 Geosyntex, Inc.

Dewatering Filter Bags

DX2 Dewatering Filter Bags are designed to collect silt and sediment from pumped water and are ideal for construction site dewatering applications. To begin dewatering insert the 4" to 6" discharge hose into the custom designed neck and secure the attached D-Ring tie straps to the hose. DX2 Dewatering Filter Bags are made from an 8oz nonwoven geotextile fabric and meets AASHTO M288 Class 1.

Bag sizes

6' X 6', 10' X 15', and 15' X 15'
